About us:

Supacow Dairy is an award-winning, Australian family-owned and operated company spanning five generations and 160 years of agricultural experience. With 700 cows and an automated rotary dairy, we focus on implementing best practice systems and continually improving what we do. For instance, we have excellent farm equipment because we lease-finance and get new gear every 5 years. Our calf-rearing facilities are state-of-the-art with individual calf pens and surveillance equipment in the calving shed to allow for remote monitoring. We are one of only a handful of Australian dairies to implement a 14-month lactation cycle rather than the standard 12. Its innovations like these that led to us winning the Sustainability Award and becoming finalists in the Employee of The Year Award as part of the Great SW Dairy Australia Awards.
